SUMMARY

Frontend Engineer with 3+ years shipping production React, Next.js, and TypeScript at Cloudgov — a multi-cloud FinOps and governance platform. Built the design system, led the docs platform end to end, integrated Okta SSO, and shipped executive-facing dashboards with complex data visualization. Also ship React Native (Expo) for the company's mobile app.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks: React, Next.js (Pages + App Router), React Native, Expo
State & Data: Apollo Client (GraphQL), Zustand, Redux, REST APIs, Formik
UI & Styling: Chakra UI (v2 + v3), Tailwind CSS, ShadCN, Material UI, Gluestack UI, Framer Motion
Data Visualization: Chart.js, react-chartjs-2, react-data-grid, Monaco editor integration
Testing: Jest, React Testing Library, Cypress
Tooling: Git, Docker, AWS (basics), CI/CD (buildspec / AWS CDK), Figma, Docusaurus, Wordpress
Backend: Node.js, Express, MongoDB, ClickHouse
Other: Okta SSO integration, Stripe integration, Web Vitals, Responsive design, Accessibility

PROFESSIONAL EXPERIENCE

Full Stack Engineer, Frontend — RKS Cloud (Cloudgov)

Jul 2023 – Present

Navi Mumbai, India

Cloudgov — Web (Next.js 15, TypeScript, Chakra UI, Apollo / GraphQL)

- Built and maintain Cloudgov's UI foundation — a design system in React + TypeScript on Chakra UI v3 — reused across the CXO Dashboard, Insights, Anomaly detection, and multi-cloud Onboarding flows.
- Shipped executive-facing surfaces including the CXO Dashboard (KPIs, drill-downs, forecast views using Chart.js) and the AI Governance suite for LLM-cost visibility.
- Owned the multi-cloud Onboarding flow across AWS, GCP, Azure, Datadog, and Databricks — connector wizards, credential-handling UI, and validation states.
- Built a configurable alerting UI (rule builder + preview) used by ops and support teams to catch anomalies before they hit customer bills.
- Integrated Okta SSO for enterprise tenants — SAML callback flow and org-scoped session state.
- Integrated Stripe for subscription billing and the payments UI.
- Wrote unit and integration tests with Jest and React Testing Library; kept the shared UI covered as the surface grew.
- Frontend performance: route-level code splitting, dynamic imports for heavy widgets (Monaco editor, chart-heavy dashboards), image optimization, and asset lazy loading — noticeably faster time-to-interactive on the main dashboards.
- Improved organic discoverability through Next.js metadata, sitemaps, and structured data on public product pages.

Docs & Marketing Platforms

- Owned Cloudgov's Docusaurus documentation site end to end — IA, design, build, CI/CD deploy — improving self-serve onboarding for customers.
- Built and maintained supporting WordPress marketing surfaces alongside the product docs.

TRZR — Mobile (React Native, Expo, Gluestack UI)

- Shipped cross-platform features across Android and iOS.
- Built a shared UI kit on Gluestack UI for parity between platforms.
- Integrated native modules — camera, geolocation, Expo push notifications — for core in-app features.
- Reduced re-render churn on feed screens by memoizing list items and moving derived state out of render.

PROJECTS

MedKart — Full-Stack Healthcare Web App · Code: <https://github.com/ankit2341/MedKart>

- Order-medicines and book-lab-tests flow built with Next.js, TypeScript, Node/Express, and MongoDB — auth, cart/checkout, and search.
- End-to-end from schema design to responsive UI; highlights the order lifecycle and prescription-upload handling.

E-camp — Camp Discovery & Booking Platform · Code: <https://github.com/ankit2341/E-Camp-app>

- Camp browsing and booking web app on Next.js, TypeScript, Node/Express, and MongoDB.
- Filtered search and booking flow with a checkout UX designed to compress the steps between browse and confirm.

EDUCATION

Full Stack Web Development — Masai School · Bangalore, India

Apr 2022 – Apr 2023

Bachelor of Engineering — Pune University · Sangamner, India

Jun 2018 – Jun 2021
